

Dear Colleague:

Yesterday morning, the Biden-Harris Administration launched [Invest.gov](#), a new website which shows the impact of our Investing in America agenda. [Invest.gov](#) features crucial data on the progress we have made to implement the transformational legislation we enacted last Congress with – much of which passed with little or no Republican support – including the American Rescue Plan, the Bipartisan Infrastructure Law, the CHIPS and Science Act, and the Inflation Reduction Act.

From national and state-by-state statistics regarding these laws' impact on job and business creation to interactive maps that track public infrastructure projects and private investments across the country, [Invest.gov](#) offers our Members invaluable resources they can use to highlight how Democrats continue to deliver For The People. The website will be updated regularly with new data that demonstrates how these laws are creating opportunities for people in every region, state, Congressional district, and zip code in America.

As Chair of the Regional Leadership Council (RLC), I joined our twelve RLC members in pushing for the development of a central hub for information and data on the ongoing implementation effort. We were pleased to work with the Biden-Harris Administration to ensure that [Invest.gov](#) includes much of that data. Providing easy access to this information is a key part of the RLC's mission to identify funding opportunities, implement these policies, and inform the American people about how we're Investing in America.

These new resources, however, will only make an impact if Members use them. I urge every member of our Caucus to visit [Invest.gov](#) and to take advantage of its many tools. Whether speaking on the Floor, spreading our message on social media, or hosting events in your district, use this information to amplify the Investing in America Agenda.

I also encourage you to reach out to your region's representative on the RLC to let them know how we can best help you highlight Democrats' accomplishments in the 117th Congress. We want to hear what is and isn't working in your districts so that we can present the best pitch possible for the Investing in America Agenda.

Thank you for working to deliver on the promises that these laws represent. I look forward to seeing the creative ways that you will use Invest.gov's resources to advance that mission.
