

*"Since taking office, President Biden created a recession, caused inflation to hit a 40-year high, destroyed American energy independence, created the worst border crisis in American history, allowed criminals to run rampant, and turned Afghanistan over to the Taliban," **Senator Marsha Blackburn said.** "Biden has spent over \$5 trillion to fund a socialist agenda, increased taxes on hardworking Americans, and hired 87,000 IRS agents rather than 87,000 police officers and border patrol agents. Biden has turned our military woke and tried to fire our brave servicemembers that refuse to comply with his forced vaccine mandate. Americans are struggling to pay their bills and cannot afford another four years of Joe Biden's socialist, totalitarian agenda. Under President Trump, our economy was booming, unemployment was down, gas prices were low, and inflation was under control. Our border was secure, our adversaries feared us, and our military was strong. On day one, President Trump will get to work lowering costs for hardworking working families, get our economy back on track, keep inflation under control, secure the border and put violent criminals behind bars. He did it once, and he will do it again. President Trump will Make America Great Again, and I look forward to having him back in the White House."*
